Bed Bugs Control

Bed bugs have nothing to do with the cleanliness of your home!

The inherent quality of bed bugs is that they are hitch-hikers. Due to this, your home can't be bed bug-proofed. You can only treat it. They easily travel by latching on to clothes, baggage and even laptops. This makes pest control for bed bugs a necessity in the cleanest of homes too.

Rodent Control

Mice are a part of the rodent family that includes rats and bandicoots. They are omnivorous, intrusive, smart, adaptable, alert and very fertile. Rodents are one of the most disastrous urban pests. They live at our expense, invade our homes, eat our food and damage our belongings. Symptoms like fever, chills, inflammation of the spinal cord/ around the brain, muscle aches could be the result of LCMV, of which the primary carrier is the house mouse. If you're shocked at reading this, there's more. From causing a fire to causing plague, they are capable of any disaster, thus making them one of the most dangerous pests to have in your home.

Cockroach Control

If a slipper, broom or paper roll is your cockroach control solution, it's time to re-evaluate. Your method might be effective for the cockroaches you can see, but what about those that are hidden in crevices of your home? What you can't see, you can't attack; which is why you need Guru Integrated services help for cockroach pest control.

- Intelligel is a new-age gel treatment that uses highly effective yet eco-friendly chemicals with spectacular effect.
- For cockroach control, gel is applied at their most suspected outlets like wall cracks, crevices, holes in electrical appliances, etc.
- For red and black ant control, an odourless liquid is put on as a spot spray.

Mosquitoes Control

Keeping mosquitoes away forever is impossible and not a one-time event. Mosquito control is a tedious process, and you can trust our services to help you keep mosquitoes at bay. Our team works diligently to deliver sustainable and long-term solutions for your freedom from mosquitoes through its mosquito control treatment. We follow scientific practices in our mosquito control services to help you get rid of mosquitoes. Our trained and experienced technicians inspect your premises thoroughly before starting our mosquito control services.
